

INTRODUCTION:

The main goal of X.O sails is to offer a state of the art product with the finest quality and finish at all levels. **We have an “eye” for it.**

All sail lines feature the “Strip Draft Locker” to control and assist the foil in all conditions. The Strip Locker is truly a revolution as it adds an amazing stability - always related to high performance because the sailor can concentrate on his position rather than fighting the rig to get all the potential out of it.

Developed by Patrice Belbeoch, all the designs will benefit from his racing experience as well as his know how from R&D and design works with several major brands in the past.

More than a concept - X.O sails aim to introduce a new way of windsurfing.

With “out of the box” artwork –initiated by Kriangsak Morawan, head graphic designer of Partner Creations – we welcome you to a new era with X.O sails

CONCEPT:

X.O sails will also present a full line of fine art equipment, and sails being developed on specific masts within our program. High tech materials and factory controlled bending characteristics ensures maximum performance.

The X.O booms are unique, with new power efficient outlines, built in Aluminium monocoque or Carbon. – All accessories and extensions have been carefully designed for max durability and easy usage. We want to make sure all sails are equipped with matching top level equipment.
